

EXTENDED VIBRATION ON PISTA LIFE PLUS DEVICE.

The extended vibration cord serves a unique purpose - to empower users with complete flexibility in customizing the placement of their vibrations.

Its versatility extends far beyond just the neck; now, you have the freedom to apply invigorating vibrations to your shoulders, both hands, and numerous other areas.

However, a critical consideration is to ensure that these vibrations are strategically positioned on either side of the body, precisely targeting the central nervous system (CNS).

This innovative feature allows you to tailor your vibrational experience to your specific needs, enhancing its effectiveness and making it a truly personalized wellness companion.
